

### LEGEND

**BLEED** ———  
Please make sure all of your artwork extends to this outermost green line. This will ensure that there is no blank paper showing when your artwork is trimmed during production.

**CUT LINE** ———  
This pink line shows where the final cut will be. Anything that extends past this line will be cut off.

**SAFETY LINE** ———  
This blue line marks the edge of the safe printing area. Any text or any important imagery should be well inside this line or it runs the risk of being accidentally cut off.

**FOLD LINE** - - - - -  
This purple line represents the fold on inlays, with the spines on the outer left and right sides.
